Serving A Most Progressive People In The Most Prosperous District In Central Alberta

VOL. 8, NO. 38

MIRROR, ALTA., JULY 13, 1922

\$2.00 PER YEAR

Voiles and Marquisettes

We have them in Dress Lengths and by the yard. There are no two pieces alike, therefore no danger of two ladies having the same pattern. Something for every taste and fancy. **Marquisettes**, Brown and blue with beautiful floral designs. **Voiles**, Blue with satin stripe and considerable white which relieves the plainness. Cream with floral and check design. Blue with white and colored stripe. Sky with cream flowers. White with mauve stripe and flower, and several other pieces. Just come in and look them over and be convinced of their beauty and quality.

Bungalow Aprons

A good assortment to choose from in light and dark floral design, light and dark stripes, also figured. They are very reasonably priced and much cheaper than you could buy the goods and make them. Prices ranging from 95c to \$2.25.

Girls' Gingham Dresses

Just the thing for the little girls, so cool and economical. In all colors, Plaid, Check, Dotted, Blue, Stripe and Brown. Get your choice while the getting is good.

Gents' Trousers

We have a special on Trousers and they are surely a bargain at the price. Something for every day or knockabout. Just come in and look them over, they are all we say they are, a real bargain.

Gentlemen:

How about a New Suit? Our new styles and samples are in and needless to say a guarantee with every suit if not satisfactory in every way, money refunded. Can you beat that. The House of Hobbs excels in clothes.

Groceries

We stock only the best lines and give satisfaction on every purchase. The quality remains long after the price is forgotten.

VILLAGE RATE IS 30 MILLS

The regular meeting of the village council was held in the secretary's office on Monday evening, July 3rd, 1922, at 8 o'clock.

All members present. The minutes of the previous meeting were read and approved, on motion of Messrs. Spiece and Griffith. The following accounts were presented: Dr. McLennan, as health officer, \$75.00; Mirror Journal, 1.80; West. Commercial News, .65; Spiece & Son, 6.80; Cleaning hall, 1.00; Telephone (2 months), 5.00. Griffith-Spice: That accounts be paid. Spiece-Griffith: That in accordance with request of E. G. Irwin, his application for exchange of lots 18 to 20, block 96, for lots 8 to 10, block 58, be cancelled.

Griffith-Hazell: That application of Jas. Smalley for lot 3, block 25, at \$25 and 1922 taxes; and T. McEdden for lots 10 and 11, block 6, at \$10.00 each and 1922 taxes, be accepted. Also the application of W. G. Walker for exchange of lots 11 and 12, block 73, for lots 9 and 10, block 58, be accepted.

Spiece-Hazell: That in view of condition in which hall is left, and complaint of damage to property, that secretary write Rev. J. E. Collins that the Boys' Clubs will have to secure other quarters.

Spiece-Griffith: That the rental of the hall be changed to \$5.00 per evening or afternoon, except in the case of suppers and afternoon teas, when the rental shall be \$5.00, the cost to have the hall cleaned and in shape for each meeting.

Spiece-Hazell: That secretary again write the attorney-general's department, refusing to pay account to Hugh Steele. Griffith-Hazell: That lease with the Royal Bank of Canada expiring Dec. 2nd, 1923, be renewed at a rental of \$50 per month, under the same conditions as heretofore.

Hazell: That meeting adjourn to meet on the 6th inst.

A special meeting of the village council was held in the secretary's office Thursday evening, July 6th, 1922, at 8.30 o'clock. All members present. An estimate of expenditures for 1922 was presented and finally accepted as follows:

Note due the bank Sept. 1922, (insurance, salaries, expenditures, &c., to date having been taken care of by this source) \$900.00; secretary's salary July 1 to Dec. 31st, \$360.00; final payment on fire engine, \$357.25; widow's pension, \$150.00; costs re tax recovery, \$250.00; postage, stationery, &c., \$50.00—Total, \$2067.25.

A statement of assessment was also presented showing a total assessment of paid-up lots at \$67,425 and on lots in arrears but not yet forfeited \$25,047.

Spiece-Hazell: That a rate of 30 mills be struck, and secretary be authorized to levy and collect same.

Griffith-Spice: That a discount of 10% be allowed on all taxes paid within 30 days of demand thereof.

Spiece-Griffith: That J. Annesley's application to exchange lot 11, block 74, for lot 12 in block 27, be accepted, expenses to be borne by Mr. Annesley.

Griffith-Hazell: That Mr. Spiece be appointed a committee of one with power to act to investigate the hollow wire system of lighting for the hall. Griffith-Hazell: That the council signify its approval of the road work done west of town, under the direction of Reeve Spiece.

Spiece-Griffith: That the council borrow an additional \$250 from the bank to meet current expenses.

Don't let that miserable tired feeling become a habit. Get rid of it today by taking Tanlac. N. J. Devereaux.

LOCAL AND DISTRICT NEWS

Yesterday (Wednesday) was the Glorious Twelfth.

Mrs. Jas. Steele and Miss Grace Tulloch are visiting in Edmonton.

R. Thwaites, G.T.P. machinist, returned this week from a visit to the coast.

Mr. and Mrs. W. Stirling leave to-day (Thursday) for a visit at Winnipeg, Man.

Is your appetite faded? Is your digestion poor? If so, Tanlac is what you need. N. J. Devereaux.

Misses Helen and Betty Wright, of Lethbridge, are visiting at the home of their uncle, J. H. McLean.

V. F. Neis, who has been locating water for a good many years, was at Black Diamond last week locating oil wells.

R. Piper, who has been teaching school west of Leduc, is visiting his sister, Mrs. N. G. Spiece. Mr. Piper will attend court this fall.

The stomach regulates the condition of the blood and is the fountain head of health or disease. Get your stomach right by using Tanlac. N. J. Devereaux.

PIANO TUNING.—Messrs. Gavin Spence and Robert Moffat are in the district and will be pleased to execute all orders left at this office or with J. F. Flewwelling.

The Rev. J. E. Collins will be supplying the pulpit of Wesley Church, Calgary, for the next three Sundays. In his absence, Jas. Smalley will conduct the services in the Union Church.

The Mirror School Board has engaged Mr. and Mrs. J. F. Baugh, of Acme, Alta., for the senior and primary rooms, respectively. Miss Katherine Ennis, of Alix, will teach in the intermediate room.

Mr. and Mrs. Andrew Common and family leave on Sunday next by motor for Esterhazy, Sask., to visit Mr. Common's father, who is 97 years of age and has not been in the best of health. They will be away two weeks, and during their absence Fred Fletcher will be in charge of the jewelry store.

Masonic Picnic

A picnic under the auspices of Fidelity Lodge, No. 79, Bashaw; Ionic Lodge, No. 45, Alix; and Ancient Landmark, No. 109, Mirror, A.F. & A.M., will be held at Jewell's Point, Buffalo, on Wednesday, July 19th. A program of sports and races has been arranged and lunch will start at one in the afternoon.

A cordial invitation is extended to all members of the Eastern Star, the Craft and their families.

Mirror Will Hold Sports

A sports day that will be one of the best ever pulled off in Mirror is being arranged for some date around the first of August. A meeting was held in the library building last Monday evening by the Mirror Athletic Club, under whose auspices the sports will be held, and the following committees were appointed: Subscription, J. P. Waters and F. E. Murray; sports, Geo. Thomas, A. C. McNair, N. J. Devereaux and C. G. Spiece; booth, Nessadine Kelsoe, Thomas and McCormack; grounds, J. Kelsoe, J. Annesley and J. Mackay (three each beat two pairs); advertising, Carl McCormack and W. J. Good.

\$100 will be divided in baseball prizes, and other prizes will be given for races, etc., for the children and men. The sports will be held on the school grounds, which are being put in shape by a volunteer gang of our worthy citizens.

London-Paris Planes Luxurious

Accommodation is Same as First Class Railway Coach

The always are steadily developing smoother and more luxurious travel as the railways did, but at a much faster rate. The latest type of the Humber Page saloon express, two of which went off from Croydon recently after being christened by Gen. Broussard as his first performance as Director of Civil Aviation.

The new machines carry twelve people—four more than is usual at present—and 500 pounds of baggage. They weigh five and a half tons when fully loaded and have an average cruising speed of sixty miles.

The passengers can move about in side and each one has his own window which can be opened. The machines are fitted with wireless telephone and travelers can telephone to London on the way by handing their message to the pilot. The accommodation generally is that of a first-class railway carriage, with racks for light baggage. Six more of the same type are being built.

Passenger airplanes between Paris and Croydon will be in frequent contact with the ocean services. The Cunard Steamship Company has arranged, as from June 1, with the Messageries Maritimes, France, for an aeroplane service to connect with the arrival and departure of the express Cunarders calling at the French port.

By using the air service, passengers will save at least five hours in the journey to and from the French capital.

In the case of passengers arriving from New York, on Tuesday, the morning they will join a waiting motor car and proceed to the aeroplane from which they will fly direct to Paris. Forward baggage passengers can arrange for an aeroplane motor car to call for them at their hotel. Passengers can take a certain amount of baggage.

Canada's Fur Production

Regulations Governing Trapping Should be Rigorously Enforced

The fact which the wild life of Canada is paying the cost for trade may be kept supplied with raw material in enormous quantities. The taking of nearly three million animals to supply last year's demand, clearly indicates that a certain rate must be exercised and vigorous enforcement of regulations governing hunting and trapping secured. If the natural stock of wild life is not to be exhausted this great natural resource, the first to be exploited in Canada, by one of the most constant producers. Given reasonable protection, it will continue to reproduce itself and provide a source of revenue to many of our widely scattered settlers, to the trappers who penetrate the wilderness, sometimes at great risk, and to the various branches of the fur trade and industry.

Canadian Children

Are Living Under Finest Conditions Says English Physician

The principal product of Canada is Canadians. Now all of them know it, but I told them that. The most abundant in the world is less valuable than the finest children I have seen anywhere in the world. Magnificent raw stock that is the finest in the world, nurtured under conditions which could not be exceeded—not only in the country but in the towns, especially the newer western towns—without saloons or smoke-blackened stoves or slums it was taken to slums in England, which we would call garden suburbs in England—but with all the things men live by; for the body, air and light and water and fresh food, for the soul, work and play and love and worship.—Dr. C. W. Saleeby, eminent English Physician.

He Gave in: Borne. The dinner table. Husband and wife discovered in conversation.

He: You did! She: I did! He: I did not! She: I did not!

He: (The girl of a pretty color) But, and only one consideration prevents me from saying which if it is.

She: Modesty, I suppose. (He gives in.)—London "Sunday Mirror."

Pa's in Bad Again "Ma's terribly angry with Pa."

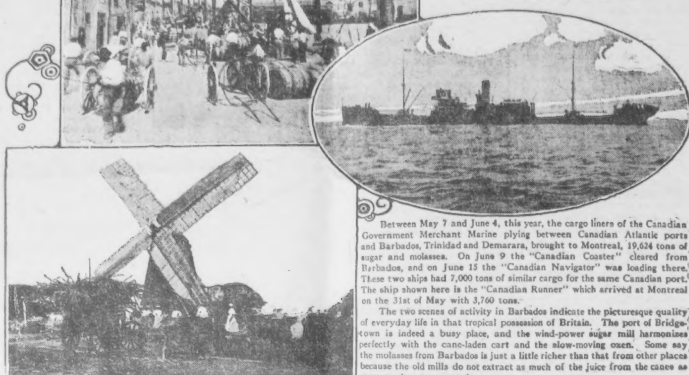

"What's the trouble?" "They had an argument the other day and Pa ended by admitting he was wrong."

"Well, that's found out that Pa wasn't wrong at all."—Detroit Press.

The statement that there are 650 daily papers in Japan makes one rub one's eyes.

W. N. U. 1128

The "National" Link between the West Indies and Canada

The ship shown here is the "Canadian Ranger" which arrived at Montreal on the 31st of May with 3,700 tons.

Between May 7 and June 4, this year, the cargo liners of the Canadian Government Merchant Marine plying between Canadian Atlantic ports and Barbados, Trinidad and Demerara, brought to Montreal, 19,244 tons of sugar and molasses. On June 9 the "Canadian Navigator" cleared from Barbados, and on June 15 the "Canadian Voyager" was loading there. These two ships had 7,000 tons of similar cargo for the same Canadian port. The ship shown here is the "Canadian Ranger" which arrived at Montreal on the 31st of May with 3,700 tons.

The two scenes of activity in Barbados indicate the picturesque quality of everyday life in that tropical possession of Britain. The port of Bridgetown is indeed a busy place, and the wind-power sugar mill harmonizes perfectly with the landscape and the slow-moving ocean. Some say the molasses from Barbados is just a little richer than that from other places because the old mills do not extract as much of the juice from the cases as more modern processes do.

Remarkable Feat of London Architect

Brick Piers Supporting Weight of 150 Tons Removed

To support part of a six-story hotel, weighing 150 tons, on wooden scaffolding and at the same time to safeguard its walls against falling outwards by wooden shores bearing against another building on the opposite side of the road, is the remarkable feat of hotel surgery which is being carried out in London.

The architect-engineer who is superintending the operation is T. I. Yeoper, and the "patient" is the Grand Hotel, Northumberland Avenue, W.C. It was recently discovered that the hotel, which was built in 1875, required strengthening, and it was decided to remove three of the brick piers supporting it and to reconstruct them with steel reinforcement.

Since a very slight dereliction of the London temporary support taking the place of a pier might cause the wall of the building to move outwards, two flying shores of wood were erected, one 25 ft. of street against a building opposite.

Although the alterations affect the building to a depth of 30 ft., the business of the hotel has not been interfered with, a partition hiding the work from the public rooms.

Common Fly Migrates Six Miles a Day

Scientists Captured One Thirteen Miles from Starting Place

Scientists are still working out the problem of where flies go in the winter if they go anywhere. A series of experiments, reports the Journal of Agriculture, have been made with 25,000 specimens of flies. The flies used were marked by putting them into bags containing red chalk pigment very finely powdered and then cannibalized they were allowed to escape.

The scientists then baited traps for their place at measured distances from the place of liberation. They were thus able to find when and where the flies roved. They found that many flies migrated considerable distances, the common house fly migrating about six miles a day. One trap reaped a catch of 100 flies, 10 miles away from its starting place.

An Expert A jurymen petitioned the court to be excused. "I see a man twenty-five dollars that I borrowed, and as he is leaving town today for some years I want to catch him before he gets to his trial and pay him the money," he said. "You are excused," the judge answered in a very cold voice. "I don't want anybody on the jury who can't like you."—Boston Post.

At That Scene Heck—Your wife is certainly a remarkable woman.

Heck—Think not.

Heck—Indeed I do. Don't you?

Peck—Well, she certainly is able to make more remarks than any other woman I know.—Boston Transcript.

A machine has been constructed by which an airplane can feed him self typewriter and even sound notes by means of only his toes.

Power Station on River Jordan

Russian Engineer Endeavoring to Plant \$5,000,000 Company

A dam is to be built at the southern end of the Sea of Galilee. The dam of part of a storage reservoir for a power station to be established six miles down the River Jordan. GALILEE AND JORDAN are great names that will always speak to an untold world seeking salvation. These names now speak to worldly mind seeking profit. Phinas M. Ruben, a Russian engineer, is in New York levitating operators to put their money into a \$5,000,000 flotation for a storage dam on the Sea of Galilee and a power station on the River Jordan, with substations at Haifa, Jaffa and Jerusalem.

M. Rubenburg is entranced with the idea of the Jewish land of electricity in Palestine and chartered with the exclusive right to develop power.

On Jordan's stormy banks I stand And cast a wistful eye To Canaan's fair and happy land, Where my possessions lie.

Byron Was Offended Resented Friend's Remark that He Was Getting Fat

It is said that Lord Byron, the great poet, continually feared getting fat. He once told a friend that everything he ate was immediately converted into talow and deposited on his ribs. He would eat on his knees and soda water for days, then, when he was so near starving that he could stand it no longer, he would mix up a horrid mess of cold potatoes, rice, fish, or greens, diluted in vinegar and slobber it down like a famished dog.

One day one of his old friends said to him, "Byron, how well you are looking. You are getting fat." Byron's brow darkened and his eyes flashed.

"Do you call getting fat looking well, as if I were a hog?" he demanded, and turning to the man with him muttered, "The beast, it can hardly keep his hands off him."

Byron never forgot the poor man who, in trying to pay him a compliment, had thus offended him.

Axle Grease for Poles

"Before Blackstone sailed south on the Concord, said a friend, he got all kinds of boxes and packages from cranks—tea tablets, medicated wafers, rowing underwear, compressed fuel, and so forth. A ship captain once sent him a small keg labeled 'Not to be opened till the furthest point is reached.' Blackstone, the captain, a witty bird, opened the keg at once. It was full of lard or some other substance, and inside the cover were these words: 'Axle grease for the poles.'"

A Definition of Tact Questions asked have been asked for a definition of the word "tact." Well, a certain woman 50 years of age, well-dressed and left her husband and family in his ad. the husband wrote, "She may not be 50 because she looks like only 47." She's back home now. (Of the great idea)—The Congressionalist.

The average wage of housemaids in Germany is said to be \$4.40 a month.

Flies Menace Livestock

Bulletin Showing How to Deal With the Pests

A bulletin dealing with the morphology and biology of a Canadian cattle-infesting black fly, which has proved no troublesome to livestock owners in Northern Saskatchewan, has been prepared by Professor A. E. Cameron, M.A., D.Sc., entomologist in charge, at the University of Saskatchewan.

Many reports have been made by agriculturists at various times concerning the fatal results following serious epidemics of this fly in Saskatchewan. In 1912, it has been stated on excellent authority, larvae of the black Lake district suffered the loss of about 100 head of cattle, horses and mules, and limited numbers of smaller losses have been reported from the Carleton and Rosethorn districts in later years.

Among the natural enemies of the larvae are the mayflies, stoneflies, and a species of fish known as the sculpin.

As a result of the experimental tests with minnows (phoxinus) it has been shown that the larvae can be killed.

A certain amount of protection against the attacks of the females is secured by grazing cattle and horses from the smoke of "smudge," consisting of ill-ventilated, smoldering fires made of any kind of rubbish. The animals may also be temporarily protected by being sprayed with oily preparations, which have been found to be more successful in repelling the pest.

Too Much Gold Is Detriment

Accumulation of World's Supply Will Not Enrich Any Country

A prominent British financier is quoted by Mark Sullivan in the New York Evening Post as saying Britain will pay her debt to the United States in gold. "We will throw it to you up to your eyes and to your neck and drowning in it, and yell for help," he says.

"It is no life threat. Gold is not real wealth, but merely the symbol of wealth, a medium for the exchange of goods. In 1915, could we have the world's gold in this country, it would not enrich us. It will be a positive detriment to us. We are likely to learn by costly experience what we might learn more cheaply by the use of our wits.—Commerce and Finance.

Proved It Rich Under the water, might as well stop moaning about Miss Dute. She hasn't been in love with you. She's been after the money she thought you'd blabber from me.

Nephew—Impossible! Why do you think that?

Uncle—I have proposed to her myself and been accepted.—New Haven Register.

Airplanes in Sardinia Four cities in Sardinia have been visited by an airplane mail service.

Some men owe their position in society to their wives, and every thing else they have to their creditors.

Storing Of Vegetables

How Best to Keep Perishable Farm Products and Where

An early fall, a cellar under the barn driveway, a cellar under a building, and an isolated cellar provide four ways in which farmers can best store their field roots and other perishable products. Methods in which the three cellars can be constructed or adapted for the purposes are described in Pamphlet No. 16, new series, of the Dominion Department of Agriculture. The pamphlet is fully dealt with in Exhibition Circular No. 87, and is therefore omitted in this pamphlet. Besides giving minute particulars of the nature and amount of material required in each instance, the plans submitted have been designed with an eye to simplicity and economy in construction.

It is pointed out that the elements to be first considered for the preservation of vegetables in their natural state are ventilation, temperature, moisture, drainage, depth and location. All these matters are taken into consideration. The cellar under the barn driveway is of course intended only for the keeping of feed for the livestock. The plan given provides for a cellar 11 feet by 20 feet inside with a storage capacity of 750 bushels on a depth of 5 feet. The cellar under a building is so nearly like the other cellars that no special description is thought necessary. Three types of an isolated cellar are dealt with and designated as C1, C2, and C3 respectively. C1 is a type which was tried with success for eight years at Lethbridge, Alta., the experimental Station, and C2 one that has been in use at Rosneath, Sask., since 1907. C3 is different from the others, principally in the matter of its roof, two methods for forming which are given. It is also a little more expensive. If the soil be sandy and the ground high, the most favorable conditions are offered for the cellars.

Many Nondescript Hogs Hogs to Grade Select Must be of Bacon Type

Dominion Livestock Commissioner states that Canada today has more nondescript hogs than she had ten years ago, and that the general lack of high quality in her hogs is a source of regret to every province. In substantiation of this statement he gives an estimate of the hogs that would probably grade as select for bacon purposes. In Ontario and Prince Edward Island the figures are from 35 to 40 per cent; in Manitoba, from 30 to 35 per cent; in Quebec, from 20 to 25 per cent; in Saskatchewan, from 15 to 20 per cent; and Alberta, from 10 to 15 per cent. This indicates pretty clearly by the extent to which hogs are being bred to the bacon type in the several provinces. Right breeding, the key to learn from the same authority that increased purchase of breeding stock was noted during the past winter. This cannot fail to have a favorable effect in the quality of production in the near future. In the absence of expert grading, a strong infusion of the use of suitable hogs would greatly improve the bacon quality of the thick-smooth type of hogs, which predominate in Saskatchewan and Alberta and exist to a considerable extent in Western Ontario.

Meaning of Red Sunsets

Timely Warning When Seen During Hurricane Season

An approaching hurricane may affect the atmosphere and the rays of light passing through it for more than a thousand miles, says the Scientific American. When a true flame-colored sunset is seen during the hurricane season before the 15th of April, even when there is no particular fall in pressure, it is wise to hurry to safety. This extraordinary phenomenon precedes the sea swell and upper cloud movements by from twenty-four to thirty-six hours. It must be the only timely warning of the dangerous tropical storm of small diameter.

On Being Prepared

Would Prevent War by Being Prepared For It

It is less wise to protect our country from inside and our coasts from invasion than the lives and property of our people from fire and crime? Still another dangerous fallacy is the belief that we shall not have another war. Who is wise enough to know? If there results even the faintest possibility of war in future, isn't it better for us always to be prepared than to suffer once? Who, on the other hand, would have been made to believe that in five years we should have fought a war in Europe with two million men? Who, in 1912, can say what we shall not be doing five years hence? We have treated, it is said, So, also had Europe in 1916.—New York Tribune. Correspondent.

Bulk of Newspaper Goes to U.S. Approximately eighty-five per cent of the newspaper production in Canada is exported, most of it going to the United States.

The first aerial Derby—the annual race around London—was won in 1912 by Sowerby, who flew 81 miles in a speed of 60 miles an hour. In 1919 the winner's average speed was 119 miles per hour.

The mariner's magnetic compass of today is the same in principle as that used by the Chinese 1,500 years ago.

Steps are now being taken for the organization of a Quebec Provincial Government, expediting into the Province territory, the first step of which will be the establishment of a series of posts or stations, from which later on, the first step of exploring this territory and gathering information regarding its topography, rivers and minerals, resources in timber and minerals, will be undertaken.

The sun, if it were a hollow sphere, would be worth a million globes as large as the earth.

George School Results

Writing Grade VIII, Departmental Exams: Paya Hurt, Mabel Miller, Marion Sutley. Passed from Grade VII to VIII: Cleo Sharpe, Oda Crooks, Clarence Sutley, Emil Albers, Virgil Nais, Blake Dowswell, Wayne Crooks.

Passed from Grade VI to VII: Madeline Dowsell, Herman Wiggins. Passed from V to VI: Norman Ray (honors), Alice Peterson, Harold Hawkins.

Passed from IV to V: Alton Hurt (honors), Lyman Sutley, Elsie Albers, Lucile Hawkins and Orrin Wiggins, combination.

Passed from Grade III to IV: Mildred Ray, Donald Sutley. Passed from II to III: Phyllis Nais, Luciana Nais, Valaida Davidson, Dorothy Sharpe.

Promotions made during the term, from IV to V: Marion Brewster, Frank Brewster, Alice Barker.

From II to III: Hazel Minkler.

From I to II: Martha Albers, Kenneth Ray, Margie Sharpe, Carl Peterson, Wayne Hawkins.

Grade I: Frank Wiggins. Beginners at Reader: Josephine Nais, Vernie Nais, Ivy Nais, Bertia Bowby, Grace Bowby, Arthur Bowby, Elene Peterson, Jean Minkler, Willie Dowsell.

Enrollment during year, 51; enrollment at end of term, 57.

GEORGE DISTRICT BUDGET

Miss Edith Rider, who has been visiting with Mrs. Geo. Peterson, returned today to her home east of Buffalo Lake, accompanied by Miss Alice Peterson.

Mr. and Mrs. P. B. Crooks left today on a trip to Southern Alberta.

Mr. and Mrs. Geo. Nais gave a delightful party on Friday evening of last week, in honor of Miss Ruth Bergner, of Edmonton, who has been here for the past three weeks. The evening was spent in cards and dancing, supper being served by the hostess at midnight. Miss Bergner expects to return to Edmonton on Saturday, accompanied by her mother, Mrs. I. M. Bergner.

Keen regret is felt throughout the district over the fact that Miss Nellie G. Bolch has severed her connection with the George School. Miss Bolch has been in charge of the school for several years, and through her efforts, a standard of efficiency was attained that was specially mentioned by the inspectors in their reports to the Department.

The Strathcona Shield being won by George last year for general efficiency. The entire district wish Miss Bolch every success.

Philip Nais took first prize at Edmonton fair this year for potatoes. Mr. Nais also has an exhibit of grains and grasses, but the results of this are not yet known.

The school dinner given on June 30th for the pupils of George was a sumptuous affair, the inner child in each case being filled to repletion. In the afternoon three ball games were played, the first being between the George Nine and the Dads. The latter put up a good game but the boys had them beat for speed and won by a score of 12 to 0.

The boys and the young men also played a game, the former again being the winners. A game was also played between the girls and the younger boys. This was one of the most exciting games of the day, the boys, however, winning out. Ice cream and cake were served during the afternoon.

COMMUNICATION

The Editor, THE MIRROR JOURNAL.
Dear Sir,—Referring to the communication in your last week's issue, the same gentleman also once said:

"Oh ye who are so good yourself, see none and see nobody."
Ye've thought to do but mark and tell Your nebber's faults and folly!
Whose life is like a weed-gum mitt, supplied with store of water,
The hoops happen ebbing still,
And still the clap plays clatter.

Will you kindly permit me to make a few remarks with regard to the communication signed by Leona R. Barritt?

I rather think the writer of the article referred to is wandering away from the subject. I am not a reader of the Calgary Albertan, nor do I know how the resolution to which I took exception got there.

If the resolution re Municipal expenses was not referring to my District, then, I have nothing to say. But in case it did, I think the figures I took the liberty of setting forth, proved the statement in the resolution to be erroneous.

I did not try to belittle the A.L.C.F.W.A., nor their work coming from the country which I believe, voted the first woman in the world into a house of Parliament. I have

nothing to say to the work there; and an also satisfied to their right to a place in governing bodies generally. As regards the Subdivisions, I agree with the writer, for here is money and time expended in vain, at least for the time being. At the time of the organization of this Municipal District, these Subdivisions had to be taken in. Could my Council get rid of them by a stroke of the pen, I am sure it would have been done long ago. But, the holders of the titles to these lots are protected by law, and we must let the law take its course. In the meantime everything is being done to revert these Subdivisions into farm lands.

With regard to the rumor that a member of the Council had exceeded his appropriation, I can only say that my last Balance Sheet is a true statement of all accounts in all of which, which up to DECEMBER 31st, 1921, had passed through my office, and I can assure the writer, I have absolute faith in the capability of the Auditors and Inspectors of the Department of Municipal Affairs in Edmonton.

As regards criticism in general, I also agree with the writer. I always welcome criticism, but when criticized one must have an equal right to defend, particularly when there are misstatements. As far as the Council of this Municipal District are concerned, their work is always conducted openly, in public, and the last election did not show any sign of discontent as far as the retiring Councilors were concerned.

This matter is herewith closed so far as I am concerned. Thanking you, Sir,
Yours truly,
Geo. HENRIKSEN,
Secretary-Treasurer to the Municipal District of Lamerton.

Submerged

Andy Ray and Jack Mackay and their annual plunge in Buffalo Lake last Sunday and the way it happened was thusly. They were out rowing on the day as Jack went to step over one of the seats, but when he put the advancing foot down the boat wasn't there and the water was. Jack appeared. Andy raised up to say a few words that were in it for the Sunday School teacher when the boat sidestepped and he very gracefully sank to the bottom. Both the former occupants of the boat came up for air, and were just able to touch the bottom of the lake and keep their chins above water. This naturally prevented them saying very much—as the minute they opened their mouths, water trickled in. What they said to each other under these conditions amounted to nil—what they felt like saying is another question. They were rescued by a life-saving crew of three small boys.

Miss Marion Wiggins has returned from a week's visit at Calgary, the guest of her cousin, Mrs. Douglas Carr.

VILLAGE TAX WILL BE THE SAME THIS
YEAR AS IN 1921

In explanation of the high tax rate for village purposes it might be pointed out that the taxes will be the same as last year. The assessment this year is the same as for 1920 when the mill rate was 25 mills.

In spite of every effort being made by the council to pure estimates to the minimum, it was found impossible to reduce the mill rate. As can be readily seen from the total live assessment, namely \$67,178, a large number of lots are being dropped each year, and in order to raise the same amount of taxes it became necessary to raise the mill rate.

1921 at 18 mills	Tax	1922 at 30 mills	Tax
Lot assessed at \$825	\$11.25	Lot assessed at \$875	\$11.25
